Milestone Courses

should be taken in the order shown. This will help you stay on track and graduate on time.

Make Your Summer Matter.

Summer is a great time to take some elective courses and get ahead.

Helpful Hints

- If the student has no previous programming experience, the student must take CSC 101 – Intro to Computer Science before CSC 151.
- If the student has placed into precalculus, the student should take either MAT 196 – Accelerated Precalculus and Trigonometry in semester 1 or MAT 195 – Precalculus in semester 1 and MAT 165 – Trigonometry in semester 2.
- Lab Science courses must be one of these sequences: PHY 171 and PHY 172 or CHE 151 and CHE 152 or BIO 131 and BIO 132.
- CSC 257 is primarily offered only in the spring semester..

Career and Transfer Outlook

The U.S. Department of Labor projects computer/software programmers' employment to grow by 12% from 2010 to 2020. Graduates will be prepared to transfer to a four-year program. Upon completion of a bachelor's degree, students in secure software development qualify for positions such as incident response analyst, cyber intelligence analyst, software engineer, programmer, systems analyst, computer engineer, and quality assurance engineer.
