should be taken in the order shown. This will help you stay on track and graduate on time.

Make Your Summer Matter. Summer is a great time to take some elective courses and get ahead.

Helpful Hints

- Students are advised to fulfill their math requirements as early as possible.
- Students considering CAD as a pathway to engineering should consider the following:
 - If not testing into college-level math, taking the "80 series" modules of Preparation for College Math.
 - If testing into college-level math, taking MAT 195 – Precalculus for Engineering and Science or MAT 196 – Accelerated Precalculus and Trigonometry
 - Selecting chemistry or physics as the science elective.

Career and Transfer Outlook

Graduates of the program are qualified to pursue jobs in several CAD career fields, especially mechanical and printed circuit board design. Graduates work in various industries with departments in mechanical design, printed circuit design, manufacturing or architectural design.

Many graduates of the CAD associate degree program have continued their studies toward a bachelor's degree in engineering or engineering technology at a four-year college.
