TOTAL CREDITS	10		

You've FINISHED!

Milestone Courses

should be taken in the order shown. This will help you stay on track and graduate on time.

General Advising Notes

- This program is a day program on the Lowell Campus. It starts in the Fall semester only.
- To be successful in this program, students should be able to work with small hand-tools on various dental materials with precision and accuracy.
- There is an extensive laboratory component, which requires 600 hours. Students should consider this when planning their schedules.

Career and Transfer Outlook

- Certificate programs can serve as a basis for further high education or professional studies. Certificate programs require students to complete specified coursework, mainly related to particular fields of employment.
- While many students enroll in a certificate program in preparation for direct entry into employment, they often return to college, part time or full time and apply the credits previously earned to an associate degree program.
- Students of the Dental Laboratory Technology Certificate program find career opportunities in dental laboratories, dental schools and dental offices throughout New England. Students with a certificate may be eligible to continue on and complete the Associate degree.
